Ibrahim Mohamed Diab

iOS Developer

ibrahimdiab011@gmail.com | (+20) 114 545 1542 | Cairo | LinkedIn | Portfolio | GitHub

Summary

iOS Developer with 4+ years of experience building and scaling high-performance mobile applications using SwiftUI and UIKit, with 20+ apps shipped to the App Store. Led iOS teams and designed reusable architectures based on Clean Architecture. Delivered production-grade applications across mobility, logistics, e-commerce, real estate, and education, with a strong focus on performance, scalability, and user experience. Expert in modern iOS development including async/await, Combine, and RESTful APIs, with hands-on experience leveraging AI tools and LLM ecosystems to accelerate development and productivity.

Professional Experience

iOS Developer

Awamer Alshabaka (AAIT) May 2023 - Present

- Led an iOS squad, driving architecture decisions, sprint planning, and delivery across concurrent projects
- Architected a reusable SwiftUI base project with Clean Architecture (MVVM + Coordinator), Swift 6, and modern concurrency (async/await, actors), adopted across all new apps
- Shipped and maintained 20+ production iOS apps, including multi-app products (client, captain and provider), across mobility, logistics, e-commerce, ERP, and real estate
- Established code review culture and performance optimization standards for the engineering team
- Mentored junior iOS developers and streamlined onboarding through technical documentation
- Integrated APIs, payment gateways (Apple Pay, MyFatoorah), real-time sockets, and push notifications

iOS Developer

MolTaqa Nov 2022 - May 2023

- Refactored multiple legacy iOS apps, improving code quality, stability, and maintainability
- Developed and shipped new features across existing apps aligned with business requirements
- Built and launched the Talab e-commerce delivery and pickup app from scratch using Swift
- Resolved production bugs and crashes, significantly improving app performance and user retention
- Participated in app architecture decisions and backend API design

Key Projects

BEEB BEEB - E-Scooter Rental - App Store

- Built an e-scooter rental app for Saudi Arabia: live map of nearby scooters, per-minute billing, prepaid wallet, and ride packages
- Implemented camera QR scan-to-unlock with AVFoundation
- Delivered real-time scooter availability and trip progress over Socket.IO on Google Maps

SAST - School & University Bus Subscriptions - Client | Captain

- Built Client and Captain apps on the same Swift 6 base project: trip booking, subscriptions, and stop-by-stop driver routes
- Implemented morning and evening trips with live tracking and per-stop attendance
- Pushed trip and schedule changes in real time with Firebase and Socket.IO

Sakan - Real Estate Platform - App Store

- Built a smart real estate platform connecting property seekers with agents via in-app chat, calls, and WhatsApp
- Developed using SwiftUI with Clean Architecture (MVVM + Coordinator) and real-time updates via Socket.IO
- Implemented location-based smart matching, push notifications, and Combine for reactive data binding

Mesllah - Farm Management ERP System

- Built an iOS ERP system to manage farm animals: production tracking, feed, medications, vaccinations, and buying/selling
- Developed using Clean Architecture (MVVM + Coordinator) with a modular UIKit codebase
- Added offline support using Core Data with synchronization to backend services
- Used Combine for data binding and supported Dark and Light Mode

MyTaxi - Ride-Sharing & Delivery Platform - Client | Driver

- Built a ride-sharing and delivery app with real-time trip tracking, rewards system, and multiple payment methods
- Developed using UIKit with MVVM architecture, Firebase, Socket.IO for live updates, and Google Maps SDK
- Shipped both Client and Delegate (Driver) versions to the App Store

TeacherNow - Educational Platform - Student | Provider

- Developed a platform enabling content subscriptions, teacher discovery, and student-teacher communication
- Built UI using SwiftUI integrated with UIKit, Combine for reactive workflows, and MyFatoorah payment integration
- Shipped both Student and Provider versions to the App Store

Technical Skills

Languages & Frameworks: Swift, UIKit, SwiftUI, Combine

Architecture & Patterns: MVVM, MVC, MVP, Clean Architecture, Coordinator, SOLID Principles, Design Patterns

iOS Technologies: Auto Layout, Core Data, Google Maps SDK, Push Notifications, Localization, Unit Testing

Concurrency: async/await, Actors, Structured Concurrency, GCD, Operations

Networking & Backend: REST APIs, Alamofire, URLSession, Socket.IO, Pusher, Firebase, Crashlytics

Payments: Apple Pay, MyFatoorah, Thawani

Tools & DevOps: Git, CocoaPods, SPM

AI & Productivity: LLM-assisted development, MCP (Model Context Protocol), AI-powered code workflows

Education

Bachelor of Computer Science

Faculty of Computers and Information, Mansoura University — Sep 2017 - Jul 2021

Languages

Arabic (Native) | English (Professional Working Proficiency)

Community & Leadership

- Delivered an iOS development session at the Information Technology Institute (ITI)
- Vice Lead of the iOS Circle at Cat Reloaded community
- Head of Public Relations at Zerone Team (Dec 2018 - Jun 2020)
